EDUCATION

2018 - 2022	Imperial College London • Year 1: 81% average, with first-class honours in all modules, and 85% in programming	MEng Computing
2011 - 2018	Dunraven School • STEP: Grade 2 in STEP I, and Grade 3 in STEP II • A Level: A*A*A in Maths, Further Maths, Computer Science, and Physics • BMO Round 1: Perfect score in 2 questions; qualified based on UKMT SMC results • GCSE: A ⁺ (Further Maths), 8 A*s (equivalent), and 5 As	Sixth Form, and Secondary School

WORK EXPERIENCE

2019	Fire Tech Camp • Worked as a Senior C#/Java/Python instructor, for groups of children aged 14, and up • Received consistent positive feedback for my hands-on teaching style • Provided me with experience on debugging code written by others
2016 - 2019	Tutoring • Tutored children from Year 6 to Year 10, with a focus in mathematics • Improved communication skills, and practised how to explain challenging topics in simple terms
2015 - 2018	Freelance Projects • Occasionally took on clients for freelance work • Met expectations of clients through consistent communication, and flexibility to suggestions
2017	Zodiac Media • Assisted in updating a legacy e-commerce site running Magento (PHP) • Heavy use of version control for deployment, and Vagrant for web development

PROJECTS

2019	ARM Project • Implemented an assembler, and emulator for the ARMv6 instruction set • Designed custom hardware (PCB), as well as the software interface for a bi-colour LED matrix • Also assisted in implementing the extension - a Monte-Carlo Tree Search to play Connect 4	C, ARM Assembly, KiCAD
2019	eduCATE (ICHack 19) • Designed a chat platform tailored for educational purposes • Maintained organisation with a similar threading system to Slack • Implemented backend in PHP, for cross-platform compatibility, and assisted in Android app	PHP, Java
2018	Yeetr (HackKing's 5.0) • Recreated Twitter for a 90's themed challenge • Deployment through Git, and prevent basic attacks • Implemented PHP endpoints, as well as JavaScript (with jQuery) for dynamically displaying feed	PHP, JavaScript
2018	Untitled Game (A Level Project) • Generated terrain with basic MST algorithms, and generated trees with a custom mesh builder • Enemies in the game gradually improved with the use of a genetic algorithm • Web interface for scores, as well as custom LAN library for low-latency IoT lighting	C# (Unity), PHP, JavaScript (p5.js), Python
2016 - 2017	Skype4Sharp • Only public .NET library for interacting with modern Skype chats (at the time) • Used in a publicly available Skype bot, with a reach of over 5,000 users at its peak • Designed an open-sourced Skype bot, featuring a plugin manager, and a permissions system	C#

SKILLS & INTERESTS

Programming	Comfortable with C# (including Unity), PHP, Python, and Java. Also have various amounts of experience in other programming languages, including Haskell, Kotlin, C, and JavaScript. All of my public projects are available on my GitHub. I am also comfortable with markup languages such as LaTeX.
Linux	Proficient in using the Linux command line - including managing headless servers. Experience working with web stacks such as LAMP, and MEAN. Able to use standard programming utilities such as version control. Comfortable with automating (and scripting) repetitive tasks.
Mandarin	I am fluent in spoken Mandarin Chinese, and am able to converse at a reasonable pace with other native speakers.
Prototyping & Design	Explored different parts of prototyping, such as designing my own PCBs. Completed an additional course in prototyping at Imperial College London, which aided in developing my skills with electronics, as well as teaching me the basics of CAD. I also have some experience in Photoshop, and After Effects.
